**NOTICE OF PREPARATION OF AN ENVIRONMENTAL IMPACT REPORT**

The initial evaluation conducted by the Planning Department determined that the following project may have significant effects on the environment and that an Environmental Impact Report (EIR) must be prepared.

**2022-000112ENV: Islais Creek Bridge Project** – The City and County of San Francisco is proposing to replace the existing Islais Creek Bridge along Third Street in San Francisco; the project would be constructed by San Francisco Public Works. The existing Islais Creek Bridge is structurally deteriorated and seismically deficient. The proposed replacement bridge would meet current structural and seismic standards, accommodate new transit tracks, travel lanes for private vehicles, two pedestrian/bicycle paths, and would be resilient to predicted sea-level-rise impacts.

Construction is estimated to be approximately 24 months and would begin no sooner than spring 2025. Throughout the construction period, there would be no access for vehicles, the T-Third Street light rail service, or pedestrians to the bridge or Third Street between Marin Street to the north and Cargo Way to the south. Vehicles would be detoured around the site to other routes. During construction, T-Third Street passengers would use bus shuttles in lieu of light rail service south of Islais Creek Bridge and transfer to light rail service north of Islais Creek Bridge. The 15 Bayview Hunters Point Express bus would be detoured around the project site. [White]

Notice is hereby given to the general public as follows:

- 1) A Notice of Preparation (NOP) of an EIR was published on May 31, 2023, by the Planning Department in connection with this project.
